Karumba	22/01/2012	19:15	4.55m			
Mornington Island	22/01/2012	20:26	3.70m			

Notes:

The highest tides listed - often referred to as king tides - are the highest spring tides that occur during summer and winter. Generally the highest spring tides will occur in the summer when the earth is closest to the sun but in some years the highest spring tide can occur in the winter months.

Boat owners and people living along the waterfront should be vigilant at the times of these highest tides particularly in the summer months, as storms and cyclones occurring at the time of these high tides, may elevate tidal levels significantly above the predicted tide heights.
